

Assignment on Increment and Decrement operator

```
1)  int i = 0;
    i = i++ - --i + ++i - i--;
    printf("%d\n", i);

2)  int i = 1, j = 2, k = 3;
    int m = i-- - j-- - k--;

    printf("i=%d\n", i);
    printf("j=%d\n", j);
    printf("k=%d\n", k);
    printf("m=%d\n", m);

3)  int a = 1, b = 2;
    printf("%d", --b - ++a + ++b - --a);

4)  int i=19, j=29, k;
    k = i-- - i++ + --j - ++j + --i - j-- + ++i - j++;
    printf("i=%d\n", i);
    printf("j=%d\n", j);
    printf("k=%d\n", k);

5)  int i = 11;
    int j = --(i++);

6)  Guess the value of p

    int m = 0, n = 0;
    int p = --m * --n * n-- * m--;
    printf("%i",p);

7)  int a=1;
    a = a++ + ++a * --a - a--;
    printf("%i",a);

8)  what will be the expected output of this program

    int a = 11++;
    printf("%i",a);
```

```
9)  int ch = 'A';  
    printf("%i",ch);
```

```
10) char c = 'A', C = 'a';  
    printf("%d\n", c++ * ++C);
```
